

Builder's Outline Tool

Set Exact Dimensions

Builder's updated outline tool allows you to set & use exact dimensions for better precision and accuracy when labeling your floor plan.

To add an outline in MYS Builder

- 1** Click on 'Outlines' in the navigation bar.
- 2** Enter your dimensions to draw a rectangle or square. If you need to draw a custom shape, check the 'Draw Custom Shape' box.
- 3** Update the shape border and fill, then preview your outline style.
- 4** To place your shape on the floor plan, click 'Add Outline' & follow the on-screen instructions.

Add Outline

To edit an outline/shape in MYS Builder

1 Click on the **outline** or shape you want to edit.

2 Choose **'Edit Shape'** from the right panel to modify the shape design,

If using 'Edit Shape,' follow the on-screen instructions to adjust the shape by clicking and dragging individual vertices,

Or convert it to a regular, L-shaped, T-shaped, U-shaped, or chamfered polygon.

Or select the blue 'Edit' button at the bottom of the right panel **to adjust the border and fill properties and exact dimensions.**
