

# Link to an Email

Within the Exhibitor Resource Center (ERC), you can now include an email hyperlink when specifying where a page links to. When an exhibitor clicks the link, an email window will pop up, automatically populating the 'to' field with a preset email address.

1

When deciding where a page links within the ERC, **choose email.**

*This feature is available when adding widgets, checklist items, notifications, and resources.*

The screenshot shows the 'Add Widget' interface with a modal window titled 'ADD LINK'. The modal has a close button (X) in the top right corner. It contains the following fields and options:

- Link Name \***: A text input field.
- Select Link Type \***: A group of radio buttons with the following options: MYS Page, URL, SSO, File, Page, Custom Link, Exhibitor Column URL, and Email. The 'Email' option is selected.
- Email: \***: A text input field with a placeholder 'example@domain.com'. An orange arrow points to this field.
- Add Link**: A blue button at the bottom left of the modal.

2

**Enter an email address.**

*This is the email that will be prepopulated when an exhibitor opens the link.*
